

NAVY PLANE DIVES TOWARD ITS OBJECTIVE,  
SMOKING FROM STRAFING BY OTHER PLANES

# NAVAL AIR ATTACK

The stepped-up tempo of naval air attacks on enemy shipping is reflected in these scenes which record the grim end of a Jap cargo ship pounded at masthead level by Navy planes. Cameras of the plane were coordinated with gunfire to bring back visual testimony of the success of teamwork in Fleet Air operations. Teamwork between pilots and aircrewmembers has proved the deadliest weapon that can be pitted against the enemy, and recently has been emphasized as the objective aviation training program.
